

Post Treatment Instructions for BOTOX

Thank you for choosing Baskin Aesthetic Medicine

For Botox and Dysport

WHAT TO EXPECT IMMEDIATELY AFTER TREATMENT

The treatment area will appear slightly red and swollen. This is temporary and should resolve within the hour. Make up may be applied gently to the area immediately after treatment.

WHAT TO AVOID AFTER TREATMENT

Do not rub your face and avoid touching the treated area for at least 2 hours. Avoid exercise for 2 hours after treatment.

WHAT TO DO AFTER TREATMENT

You may resume your regular skin care routine this evening.

WHAT TO EXPECT AFTER TREATMENT

Botox and Dysport typically take 3-5 days to start to take effect. The full effect can be seen 10-14 days after treatment. It is best to wait the full 14 days before determining if you would like further treatment of the area. Treatment effects typically last 3-6 months. Bruising is common after injection and will resolve on it's own. We offer a quick laser treatment that may help a bruise resolve sooner. Contact us if you feel this would be helpful.

CONCERNS

Contact us if you experience discoloration of the skin other than bruising, persistent or worsening pain, excessive swelling, surrounding redness, heat, develop a fever, a cold sore or have any questions or concerns.

After hours, please call our office 207-780-0045 for instructions to reach Dr Baskin

If you have any questions after reading these guidelines, please do not hesitate to call us for clarification.
